**2024 Sikh Healthcare Technology and Innovation Summit :
Bringing Innovation to the Sangat
Friday, January 12 - Monday, January 15**

SPEAKERS BIOS

Dr. Nirmal Kaur, MD
Syncoro Health LLC
Henry Ford Health

Dr. Nirmal Kaur is a board-certified gastroenterologist at Henry Ford Health in Detroit, Michigan. She previously served as the Director of the Inflammatory Bowel Disease Center from 2010 - 2022, and established the program as a tertiary care referral center. Dr. Kaur then moved into executive roles at Henry Ford Health, where she led community physician relationships across all tertiary services and health system expansion into rural Michigan. She is now President and CEO of Syncoro Health LLC, a healthcare consulting firm that serves to improve access to specialty services for rural and underserved communities. Dr. Kaur will be sharing her experience at the NASMDA conference in 2024, and the foundation behind her professional path.

Dr. Gurpal Singh
CEO at U.S.
Dermatology Partners

Gurpal Singh is the CEO of U.S. Dermatology Partners, a leading practice management company with 2,000+ teammates across 100+ locations in 8 states. A growth-oriented healthcare executive and investor, Singh is passionate about building world-class healthcare organizations that deliver exceptional patient care experiences. Previously, he served as the Chief Operating Officer of NorthStar Anesthesia, a TPG-backed practice management company with 2,500+ teammates across 150+ facilities in 21 states and led its successful sale in 2018. Prior to joining NorthStar, Gurpal built and ran Emanation Partners, a research & analytics platform serving leading investment managers. Earlier, he was a Vice President at H.I.G. Capital where he led investments in several healthcare sectors including physician practice management, wound care, and specialty pharmaceuticals. Paul started his career as a private equity associate at CHS Capital and investment banking analyst at Citigroup.

NASMDA

North American Sikh Medical and Dental Association

Dr. Guru Singh
Founder & CEO at
Scispot

My journey began when I lost my mother because a life-saving drug arrived too late. As a molecular biologist by training, I made it my mission to accelerate biotech R&D, ensuring that no one else would have to suffer the same loss. Working at three life science software companies in the United States and Germany, I gained valuable insights into the industry. It was during this time that I discovered a significant problem: 80% of R&D data couldn't be analyzed because it was siloed across different teams and collaborators. Seeing a great opportunity to make a difference, I teamed up with my brother, a talented tech and data expert. Together, we formed a perfect duo. With our complementary skills, we set out to create a "glue" that would unite the scattered data and revolutionize biotech R&D, ensuring that life-saving products could reach those in need, right on time.

Simran Jora
Health & Social Impact
Entrepreneur

Simran's north star is finding ways to help people live joyful, healthy lives through the products, companies and communities she builds. Simran has worked across the healthcare sector - from established health systems to new startups looking to cause disruption. Her latest work focused on digging deep into healthtech innovation, where she helped an award-winning digital Health companies strategize and build their operations. She led global teams and built regulated software medical devices for the world's top pharma companies. Part of her expertise is in operations and execution.

Dr. Taranjit Samra,
DRSc, MSEE
Corporate Vice President
Quality Assurance at
Caris Life Sciences

I've been fortunate to be at the right place at the right time in my career - technologically, organizationally and operationally. As a first QA hire, I built a world-class quality management system (QMS) and quality organization from scratch, to enable digital health revolution at Verily (Google) Life Sciences. Essentially the same feat I previously accomplished at the DNA-sequencing (NGS) giant Illumina, which spearheaded the genetic revolution. Most recently, I've been working with novel companion/in-vitro diagnostic leaders in oncology in partnerships with big-pharma, in making precision medicine a reality through the power and promise of data and artificial intelligence. More importantly, I've had the opportunity to work at the confluence of various industries critical in delivering today's healthcare - medical devices, in-vitro/companion diagnostics, high-tech (software giants), pharma, biotech and clinical laboratories - as partners or joint ventures - in taking products from clinical to commercialization.

NASMDA

North American Sikh Medical and Dental Association

Dr. Amandeep Singh, PhD
MP Advisors

In my role as a strategy advisor over the last ~3.5 years, I have been fortunate to work with diverse biotech and life sciences organizations as an advisor for corporate strategy including BD&L, CI, and alliance management. My Primary area of expertise has been AI in pharma and digital health. I have advised several mid sized biopharma companies on AI adoption strategy and early stage startups building AI in pharma/digital health platforms for growth strategy, fundraising, product market fit and BD. I am a panelist in Healthcare Digital Innovation Showcase and will be sharing my insights for the above.

Dilpreet Sahota
CEO at Trek Health

Dilpreet Sahota is currently the CEO & Founder of Trek Health, a healthcare platform delivering a frictionless financial experience between mental health providers, patients and payers. The company eliminates administrative burdens required for financial transactions to ensure providers are able to maximize their time with patients. By leveraging artificial intelligence to automate claims processing, Trek Health is synchronizing providers and payers to ensure the highest quality of mental health care is delivered nationwide. He brings a wealth of experience from his previous roles as Special Ops Lead at Big Health and Growth & Analytics Manager at Health IQ.

Mandeep Dhillon, JD
Chief Technology
Chief Product Officer
Co-Founder at BeMe Health

Mandeep Dhillon is a visionary product leader, passionate about unlocking the power of emerging technology to benefit the lives of young people and their families. He is currently the Co-Founder, CTO and CPO of BeMe Health, a company dedicated to addressing the mental health needs of all teens through technology and human intervention. Previously, Mandeep led multiple product teams at Facebook, spanning notifications, college communities, Messenger for Kids, Marketplace, Pages, Integrity, emerging markets and Privacy. He developed unique insight into online privacy/safety, mobile natives, children's technology and the emerging modern web through founding 1StudentBody/Polymath and Togetherville, navigating Facebook and COPPA and selling the company to Disney.

Dr. Savreet Kaur

Drug Safety in Clinical Trials
& Clinical Development

I am an Internal Medicine physician who has made the pivot to the pharmaceutical industry, (drug safety) about 4.5 years ago.

I educated myself about this industry and specific field by networking on LinkedIn. I am happy to discuss the importance of professional networking and how in this line of work I can continue contributing to patient care and representing our community.

Dr. Manpreet K. Singh, MD, MS

Associate Professor of
Psychiatry & Behavioral Science

I am a physician scientist working to better understand the neurobiological basis of childhood onset depression and other mood disorders, and mechanisms of adaptation to stress. My expertise includes clinical and research evaluation of youth with or at risk for mood disorders, clinical trial design, data analysis and interpretation, and the development and implementation of novel diagnostic and treatment strategies and research tools. I enjoy innovating to discover and optimize therapeutic targets, and devising ways to improve mental health access and delivery. My colleagues would describe me as a passionate and entrepreneurial clinician scientist, who approaches challenges with curiosity and an openness to learning. I am ever seeking opportunities for collaboration that will allow me to develop and promote novel solutions for the treatment and prevention of lifelong mood disorders. Specific fields of interest include academic-industry partnerships, data analytics, biotechnology, and pharmaceuticals.

Dr. Sonia Sandhu, Pharm.D

Senior Director
Global & US Medical Information

Sonia is a Senior Director of Global Medical Information at Gilead Sciences, where she oversees the Virology and Established Products portfolios. She is a leader in medical insights, heading up her department's first patient insights initiative, and presenting the findings at DIA and other patient engagement forums. Throughout her career, Sonia has acquired extensive knowledge in various therapeutic areas and has published articles on medical information.

NASMDA

North American Sikh Medical and Dental Association

Dr. Deeptil Jaggi,
PharmD, MBA

Pharma/Digital Health
Executive/Board Director

Dr. Deepti Jaggi is an experienced industry senior executive with over 20 years of experience in driving innovation at the intersection of life sciences, healthcare, and technology. Her expertise is in transforming businesses through software, AI/ML, and advanced analytics. She currently serves as a Board Member at Envision Pharma Group and Tech CU. Most recently, she served as Chief Strategy & Commercial Officer at Better Therapeutics, a publicly held digital therapeutics company. Before that, she served as the Global Head of Patient Insights & Solutions at Astellas Pharmaceuticals with responsibility for the Americas, EMEA, China, and Japan. Prior to that, Dr. Jaggi served as President & Chief Medical Officer at Clinakos Inc., a Silicon Valley company at the forefront of leveraging data and AI in healthcare and life sciences. She helped grow Clinakos from startup to revenue stage, serving multiple top pharmaceutical companies. Dr. Jaggi's previous experience includes positions of increasing responsibility and leadership at Johnson & Johnson, Genentech, Oracle, and Kaiser Permanente. She has also served as a consultant to TPG Capital. Dr. Jaggi's educational background includes a PharmD from the University of Southern California and an MBA from Stanford Graduate School of Business. She lives in the San Francisco Bay Area and has experience working in US, EU, APAC and LATAM.

Dr. Puneet Arora, MD, MS

Chief Medical Officer
Lassen Therapeutics

I am an Endocrinologist and started my career practicing and teaching for several years. I then transitioned to working in Biotech/Drug development and have been in the industry for over 15 years. I have worked on novel pathways and molecules in both large and small companies including startups and in a wide variety of therapeutic areas.

Tina Singh, JD

Singh Law Corporation

Tina Singh is the lead corporate transactional attorney for innovative start-ups including both technology and life sciences companies. Tina has served as a board member for start-ups and the Palo Alto Area Bar Association, had a TV show on start-ups, chaired the legal chapter of an acclaimed book on entrepreneurship, and presented learning sessions with Silicon Valley legends such as Michael Mortiz, Ann Winblad, Guy Kawasaki, William (Bill) Draper III, and the general counsels of large public companies. Tina will be presenting “Dos and Don’ts” legal tips to support innovation.

NASMDA

North American Sikh Medical and Dental Association

Dr. Amar Sawhney, PhD
General Partner, Incept LLC

I am a MedTech entrepreneur in the Boston area who has founded and run many medical device and biopharma companies. Many of my inventions have now become standard of care in various surgical and interventional procedures. These include surgical sealants, spacers, vascular closure devices, and drug delivery systems. These products treat over a million patients each year and generate over \$500MM in revenue annually. I will speak about how to evaluate medtech investments as well as how to evaluate ones own ideas prior to launching a company.

Meeta Kaur
Writer, Lead Creator &
Editor of The Kaur's
Reimagine Story Project

Meeta Kaur is a multiverse writer, storyteller, speaker, advocate, and educator. Meeta is the creator and editor of “Her Name Is Kaur: Sikh American Women Write About Love, Courage, and Faith,” published by She Writes Press, 2014. In conjunction with the writing life, she completes her graduate work in Political Communications at American University with a concentration in political speech writing. Kaur sits on the DEI Committees for American University School of Communication, the Connelly School of the Holy Child, and Burning Tree Elementary. Additionally, she organizes for Sikhs Against Abuse in Washington D.C.. Kaur was also awarded the Hedgebrook Residency for fiction, the alumni return for creative non-fiction, and The Elizabeth George grant for fiction. She graduated with an MFA in creative writing from Mills College, and a B.S. and B.A. from the University of California, Davis.

Dr. Sanjit S. Dang, PhD

Dr. Sanjit Singh Dang, a seasoned Silicon Valley professional, boasts a multifaceted career spanning over two decades as a Venture Capitalist, Corporate Executive, Board Member, Speaker, and Writer. Currently serving as the Co-Founder and Chairman of U First Capital, he has played a pivotal role in backing industry-leading companies like SpaceX, Uniphore, Pensando, and DevRev. With a track record that includes leadership at Intel Capital, board roles in successful ventures, and contributions to Forbes as a writer, Sanjit remains a prominent figure in the tech and investment landscape, further extending his impact through advisory roles at the UN's World Artificial Intelligence Organization and the University of California President's Innovation Council.

Inderpal S. Chawla
Executive Chef

Inderpal S. Chawla is an Executive Chef with extensive knowledge of European and World cuisine and an expertise in Italian cuisine. A graduate of the Art Institute of Washington DC, he was trained under Master Chef Edwin Scholly, and furthered his studies in Orvieto, Italy under Master Chef Lorenzo Polegri. Inderpal gained a deep appreciation and understanding of cooking traditional Umbrian entrees and pastries as well as learning alcohol and wine pairing. On further studies in Italy, Inderpal assisted Master Chef Lorenzo Polegri in teaching European and World cuisine for ten weeks. The son of Indian immigrants, Inderpal, raised with a daily dose of spices and rich flavors, along with the taste of his culture add a unique influence to the dishes he creates. Inderpal brings his style, personality and energy into all aspects of working in the food industry from banqueting, to catering, to personal chef services, to cooking classes, and demos. Inderpal has a real positive personality, thrives on challenges, with positive desire to learn. He has a true passion for food, pairing wine & alcohol, his energy and humor can give a good twist to any kitchen.

Dr. Amrit K. Sethi
Dentist by Profession
Author of Children's Books

Dr. Amrit Kaur Sethi, a dentist by profession, is following her passion for writing by weaving stories for children that spark their imagination. This first-time author was born in Mumbai, India, to a family whose values are deep-rooted in the teachings of the Sikh religion. She is the mother of a young, adventurous Sikh boy, who inspires her to write stories he loves and relates to. Her books aim to subtly imbibe morals while inspiring exploration and creating space for developing values in young minds. In these books, she aims to teach them patience, perseverance, integrity, and selflessness through the medium of a fun, imaginative story. When she's not writing books, Amrit loves spending time with her family, friends, and community in the San Francisco Bay Area. She enjoys exploring new places and expressing her creativity through music and writing.
